RECENT PROJECTS

Yoopha Healthcare Application

Developed Frontend Web application for Doctor Appointment Booking and management. Used Ant design for UI components and adapted to React's new Hooks APIs. Used Redux for state management accross the application.

URL – consumer.yoopha.com TECHNOLOGY – React.js | Redux | Ant Design | SASS

Yoopha Community Platform (Social Network)

Designed and developed a powerful community platform using Node.js (Express) for backend and React.js for frontend. Developed realtime notifications using Web Sockets and implemented Image processing and compression of uploaded medias. Utilized Ant design for common UI components across the application.

URL - https://community.yoopha.com

TECHNOLOGY - React.js | Appolo GraphQL | MonogDB | Node.js | Ant Design | Mongoose.js

#Me2 - Social Platform

Designed and developed an Social Platform for 'Meme Sharing' using 'MERN' stack. Developed the API using Express.js, GraphQL & MongoDB. Frontend is a React App. The app features Image optimisation using 'Sharp' on the fly. Built a simple meme generator using HTML5 Canvas.

URL - *yet to launch

TECHNOLOGY - React.js | Express.js | GraphQL | MongoDB | Node.js | Mongoose.js

Zenmak Global

Designed and developed a business website for Zenmak, a poultry science company. Utilised Gatsby's built in GraphQL API to request data from local JSON file for the Product display page, hence making the data updates easy.
